

Discuses

This research mainly focuses on the impact of social media on Saudi children's food habits ,and how social media affects children's eating behavior and food choices. After developing a questionnaire and collect responses from Saudi parents .The results were analyzed according to the three research questions. The major findings were discovered , each one related to one research questions.

Discuses(Rq1)(What are the effects of social media on children's eating habits)

Regarding the item social media makes children's want to try new food, most respondents agreed with this statement, making it one of the highest results in Q1.Responendes also agreed with social media increases in interest in fast food . This shows that food advertisement and influncer affects on children's eating habits. On the other hand the item my chiled prefers foods seen on social media over home meals ,had the lowest agreement among the statement .This may mean that some children's still prefer home food.These findings agree with Gue(2023) who found that social media marketing increases children's interest in unhealthy food. This findings Also with smith (2018).

Discuses (RQ2 why do children rely on social media for their food habits)

Regarding the item social media affects children food choices ,most respondents agreed with this statement , making it one of the highest results in Q2.Responendes. This refers to the strong influencers and food creators on children's eating behavior. Many children trust influencers and become interested in foods promoted online . in contrast, the item my child use social media to decide what to eat .had the lowest agreement among the statement .This may indicate that although children's are affected by food content online ,they do not completely depend on social media when choosing their meals .These findings with support Smith(2018) who explained that influncer are affect on children's

Discuses(RQ3 How can parents eliminate the negative effects of social media on their kids)

Regarding the item I guide my child to choose healthy food,most respondents agreed with this statement, making it one of the highest results in Q3. In RQ3 respondes also agreed that limiting social media improves children's eating habits refers to the important role of parents in helping children's choses healthy food reduce the negative of social media . These findings with Alanazi(2023) who found a strong relationship between social media and use unhealthy dietary habits .
