

The Impact of Social Media on Saudi Children's Food Habits

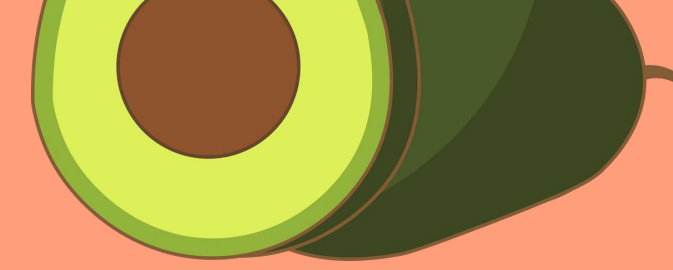

BY AHMED FARI

AGENDA

- Finding 1
- Finding 2
- Finding 3
- Limitations
 - Recommendations
- Rewriting the Research
 - Take Home Message
 - Questions

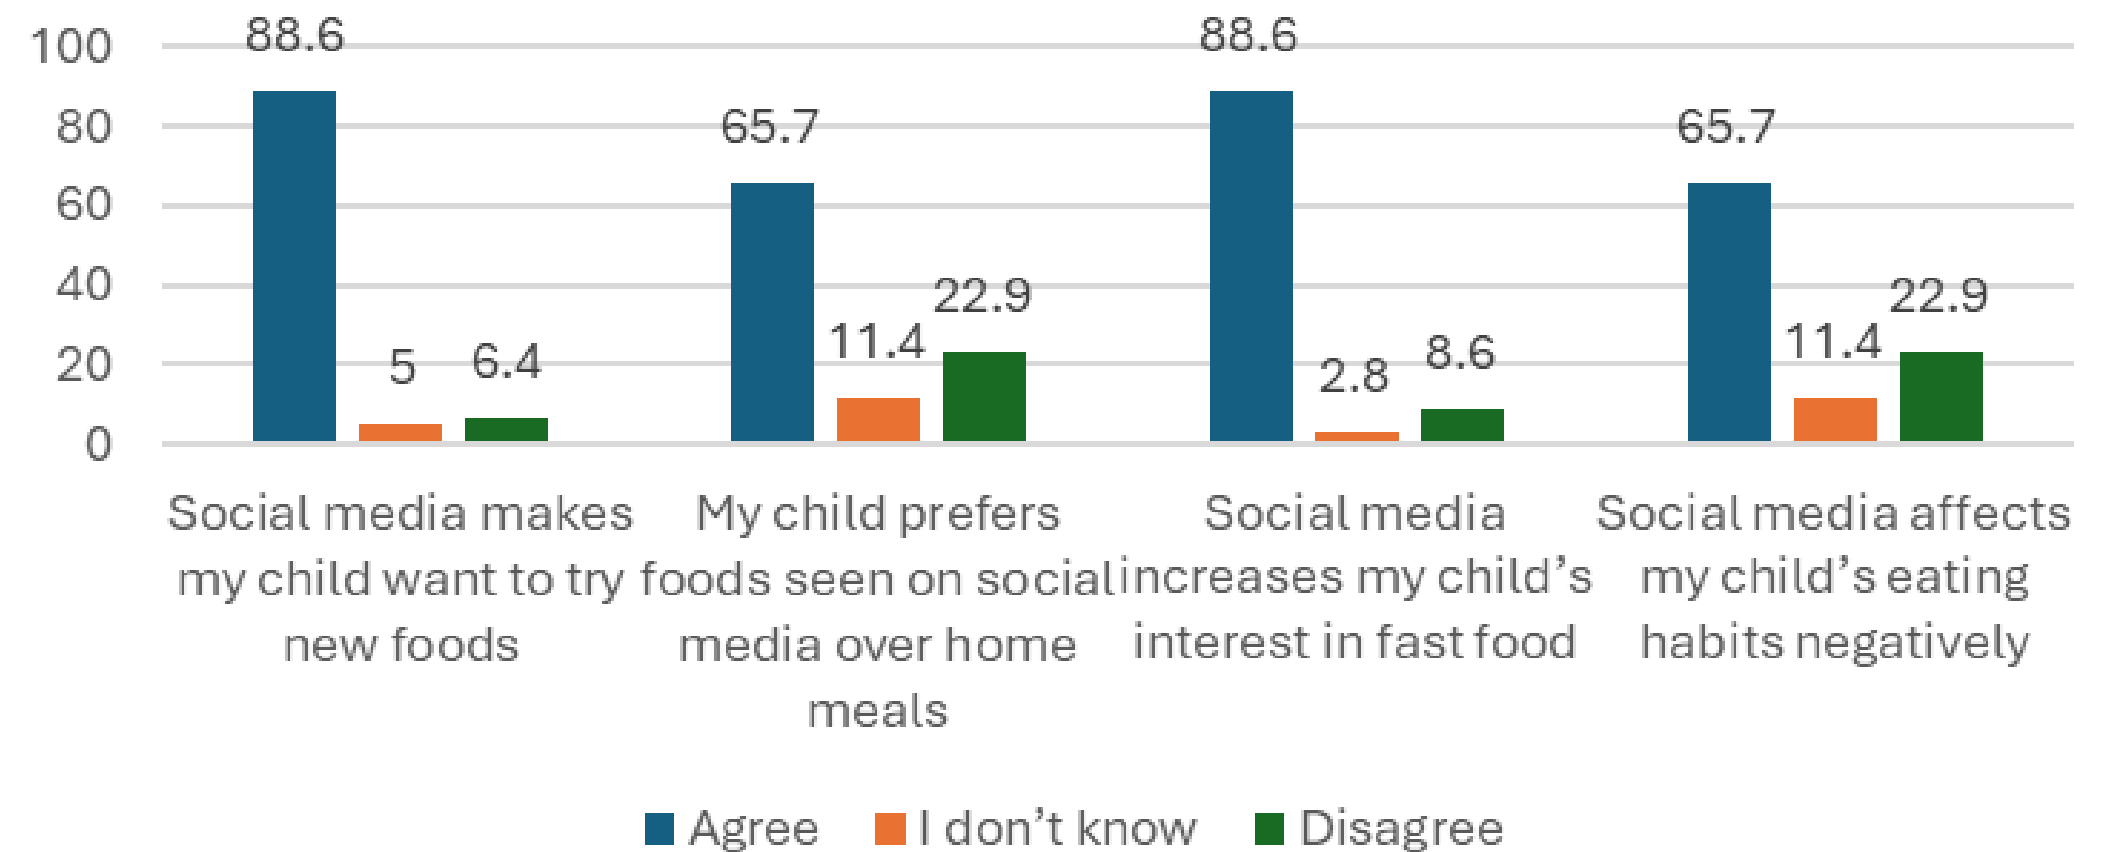

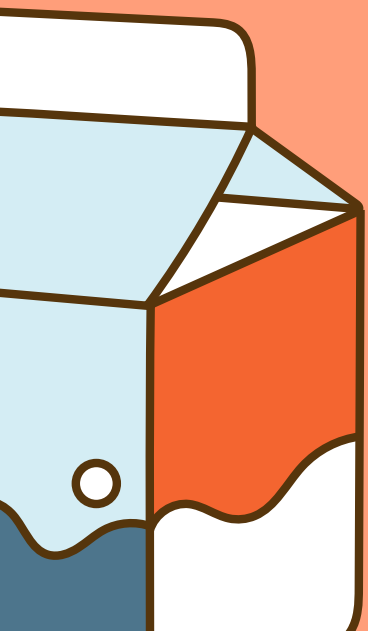

FINDING 1

Item 1:

Social media makes children want to try new foods.

Item 4:

Social media increases children's interest in fast food.

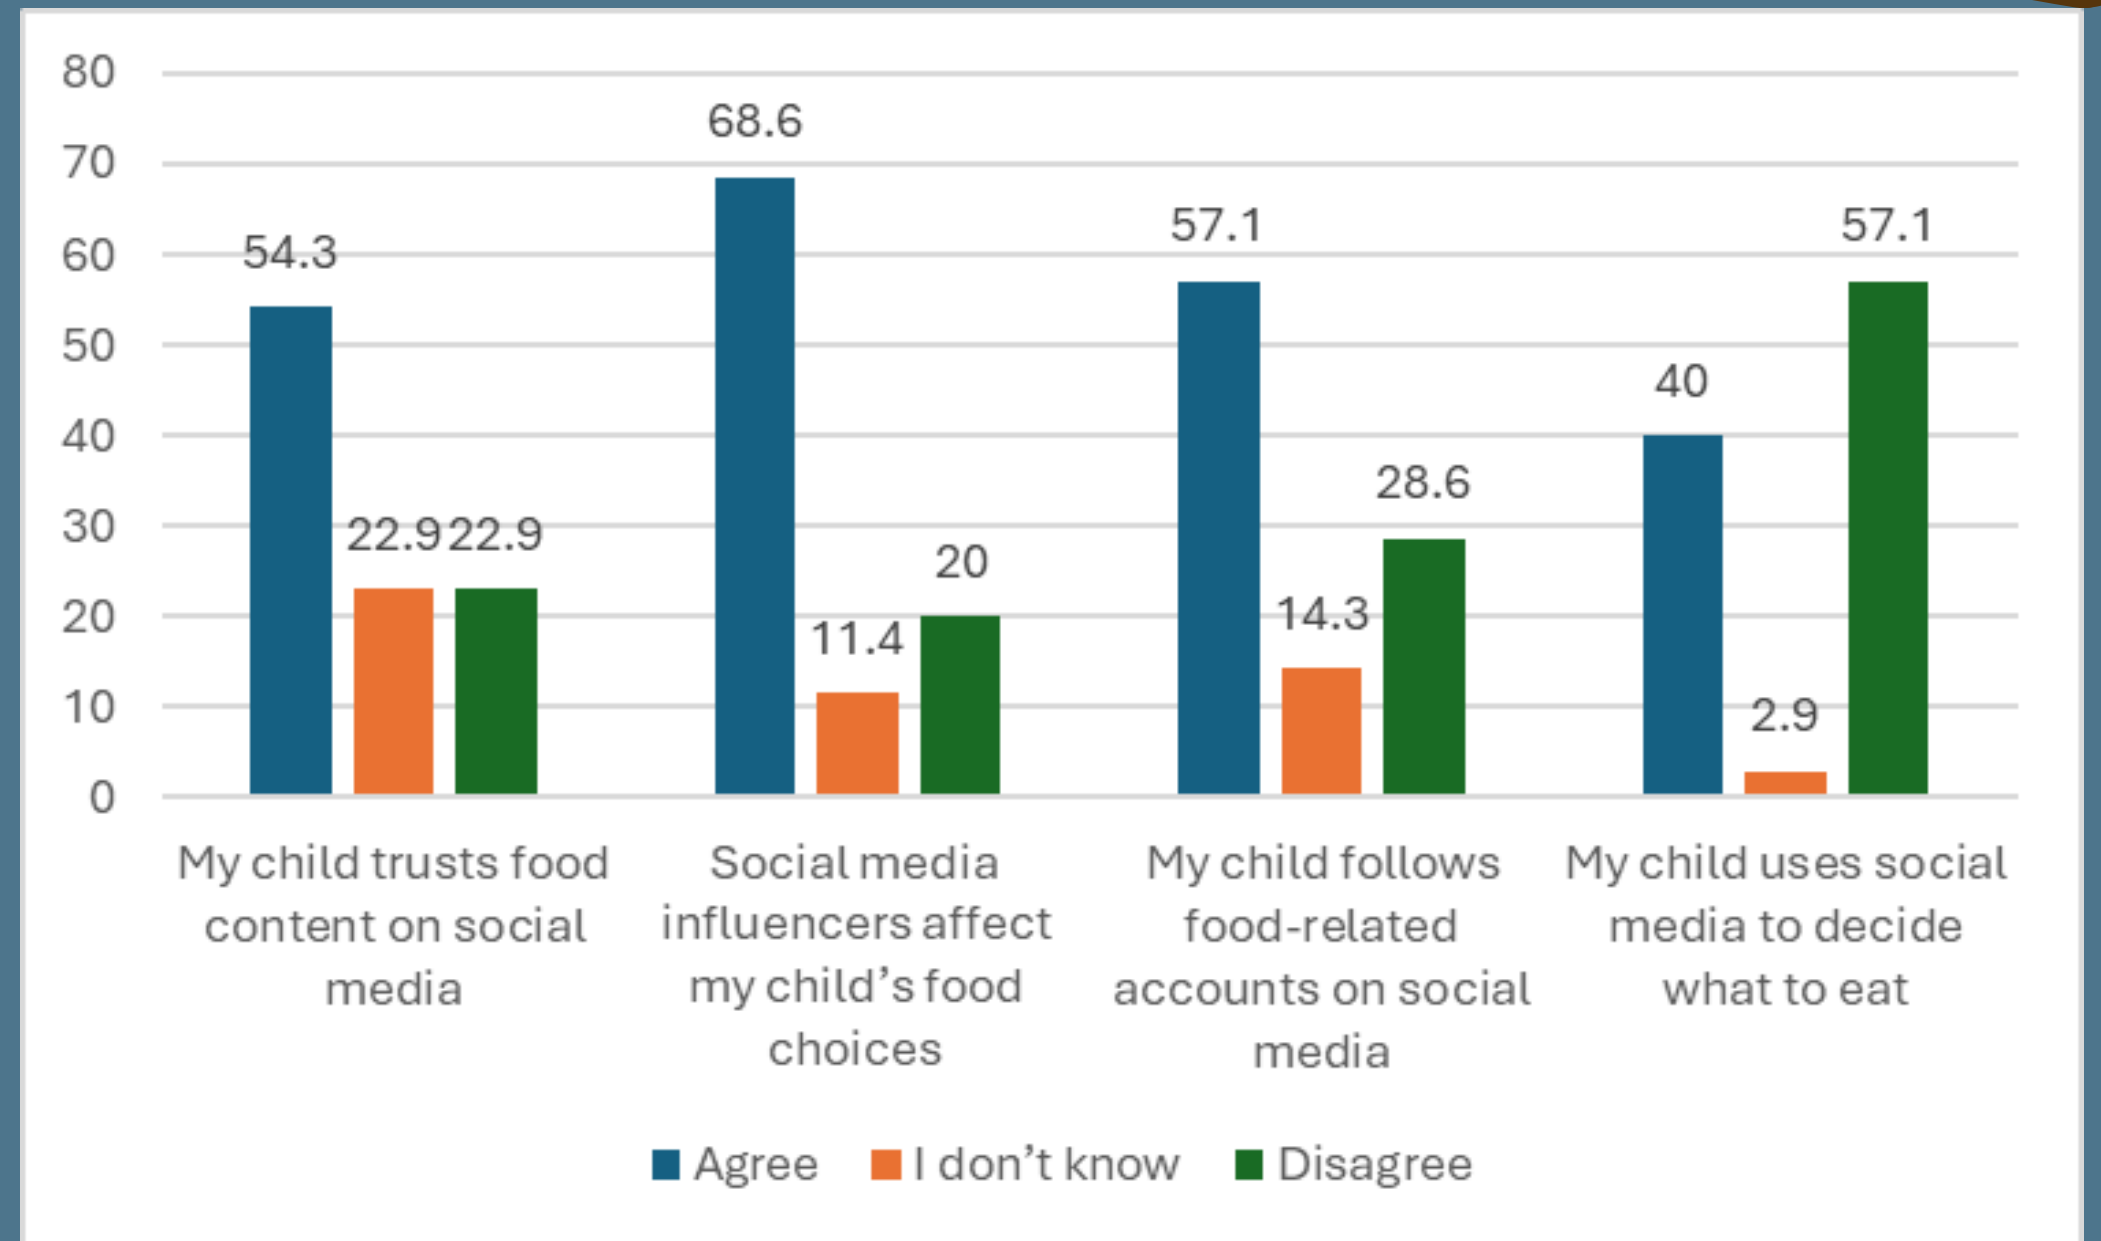

FINDING 2

Item 1:

Social media influencers affect my child's food choices.

Item 2:

My child uses social media to decide what to eat.

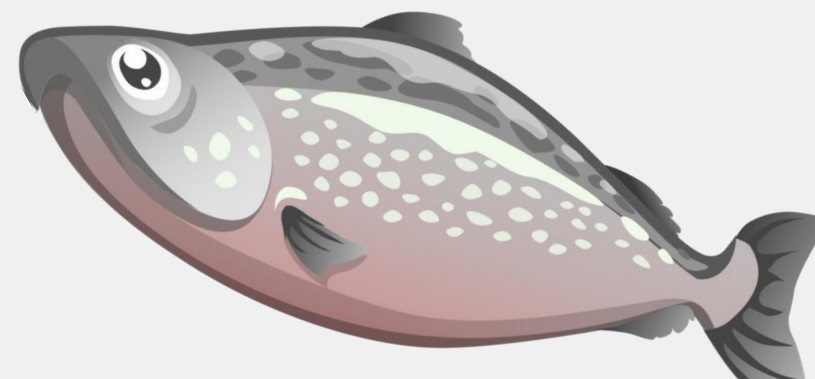

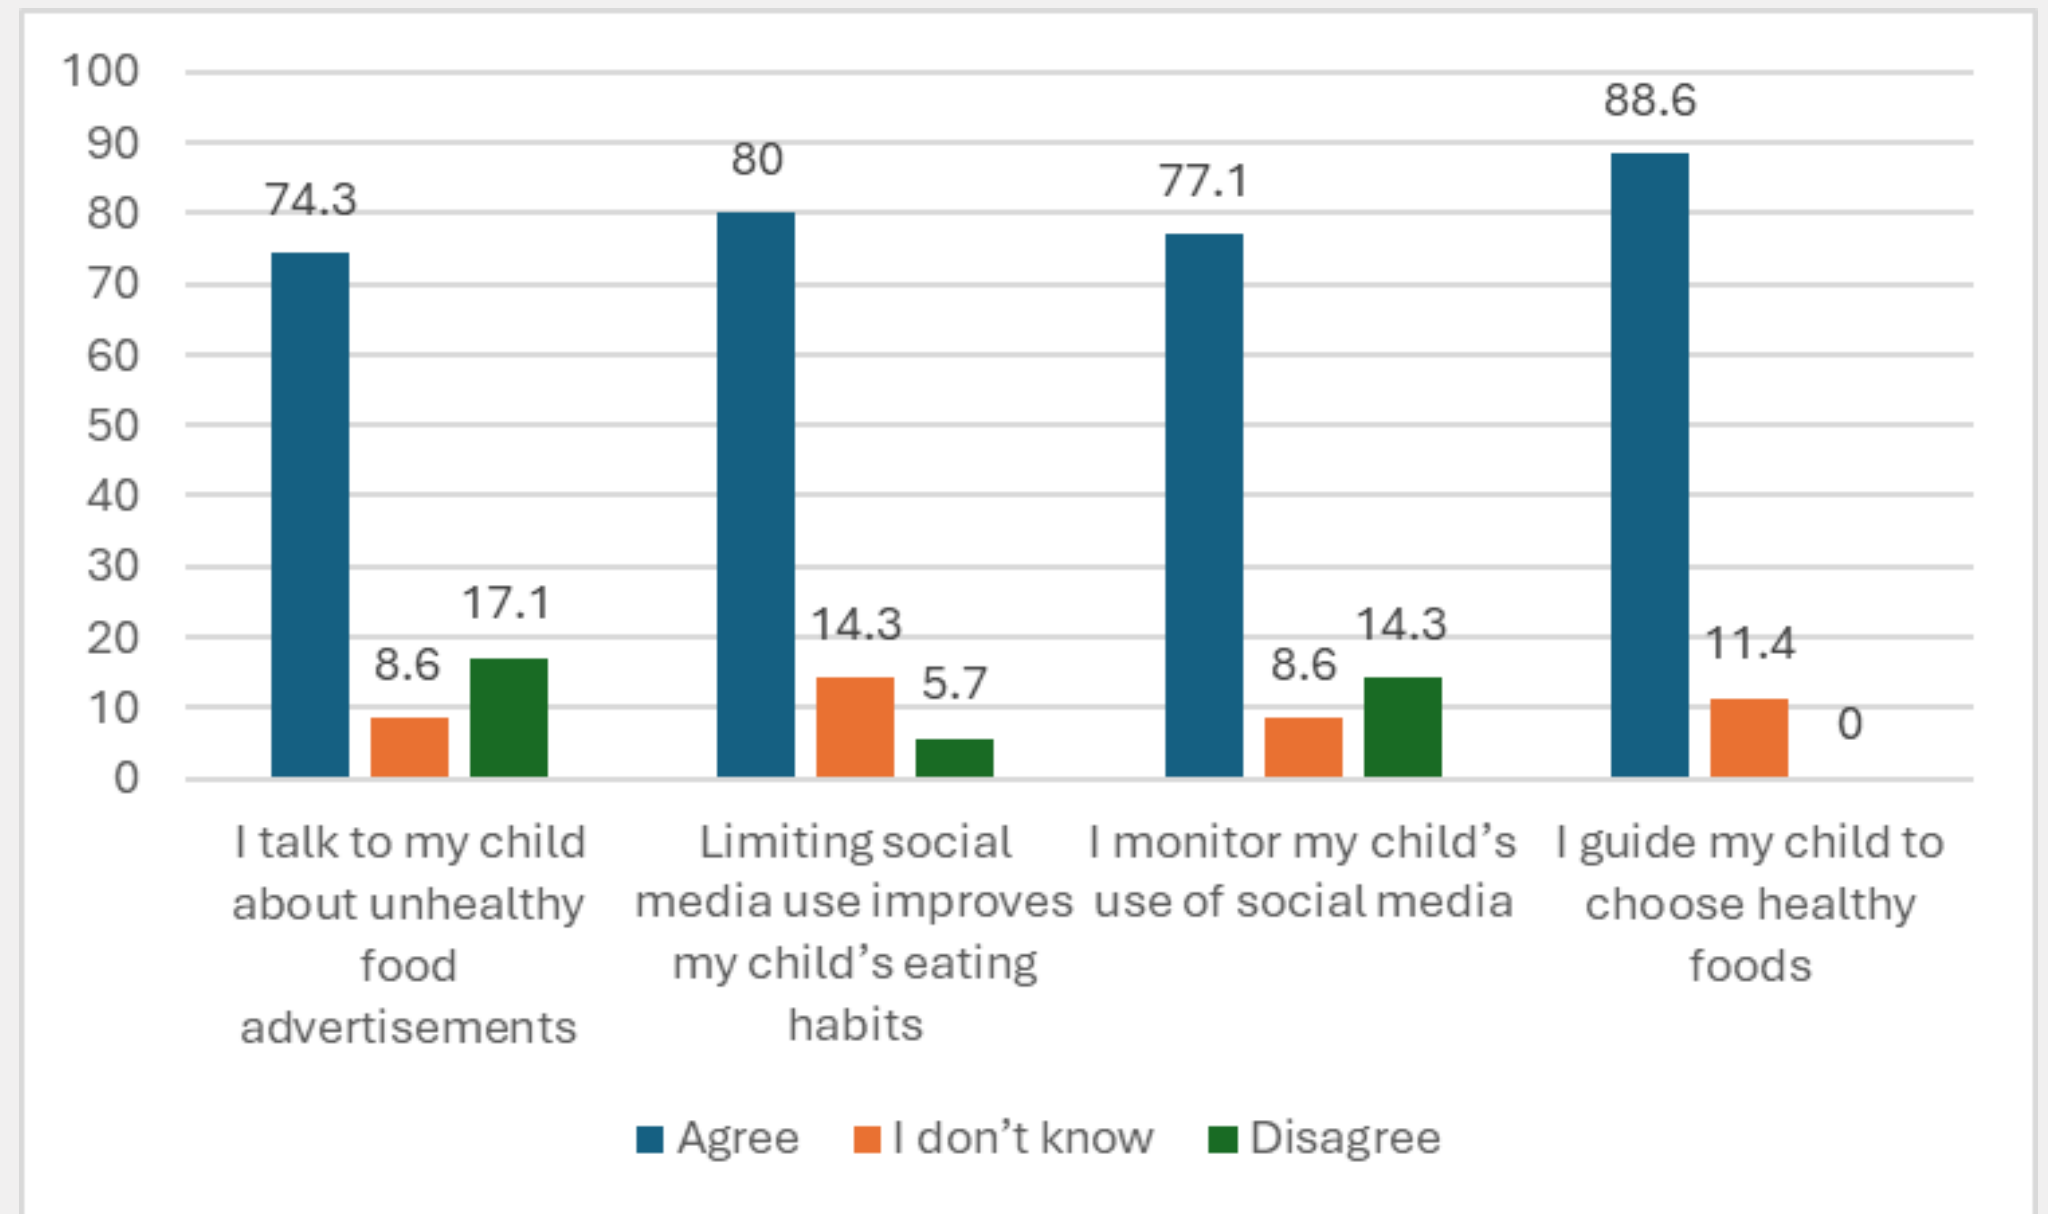

Finding 3

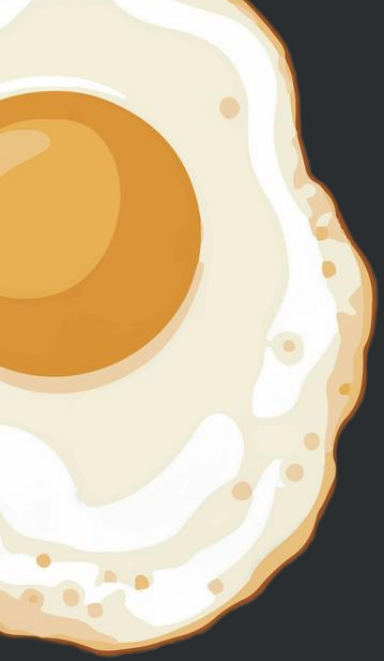

Item 1:

I guide my child to choose healthy foods.

Item 2:

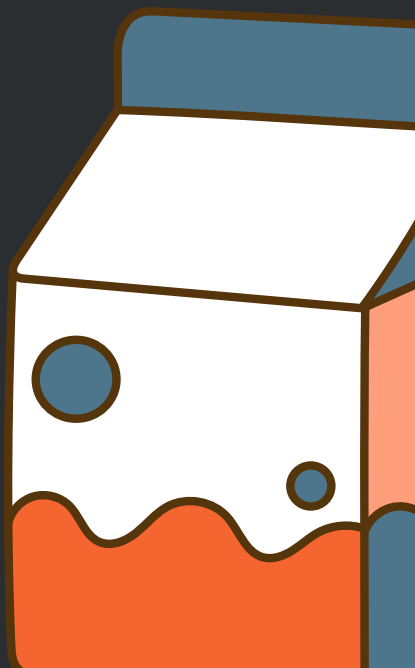

Limiting social media use improves my child's eating habits.

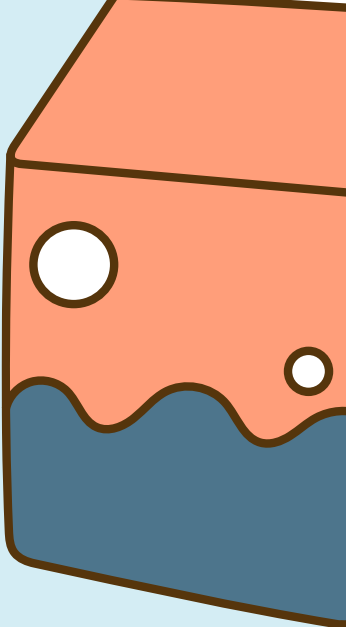

RQ1 Discussion

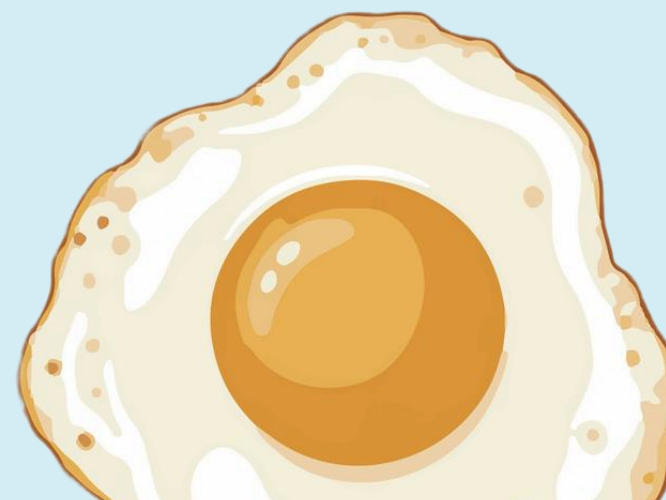

- Social media affects children's eating habits.
- Children want to try new foods after seeing them online.
- Social media increases interest in fast food.

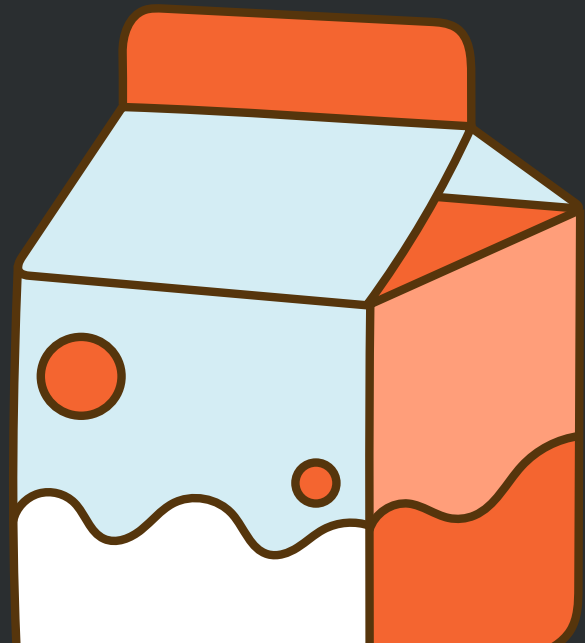

RQ2 Discussion

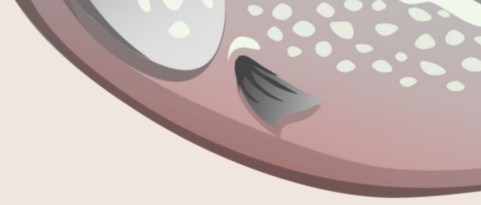

- Social media influencers affect children's food choices.
- Children trust food content online.
- Social media influences food decisions.

RQ3 Discussion

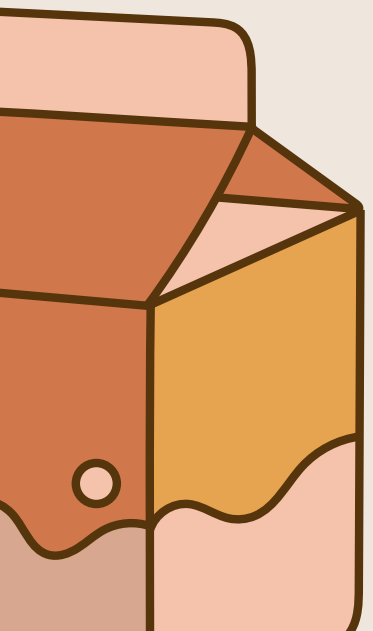

- Parents guide children to choose healthy foods.
- Parents talk about unhealthy food advertisements.
- Limiting social media use improves eating habits.

LIMITATIONS OF THE STUDY

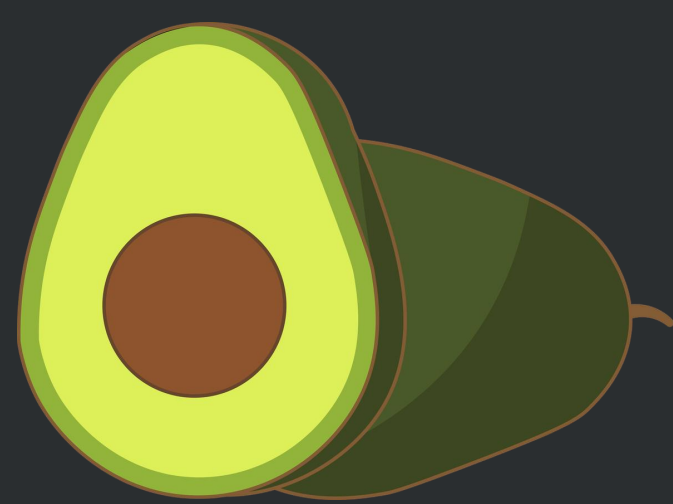

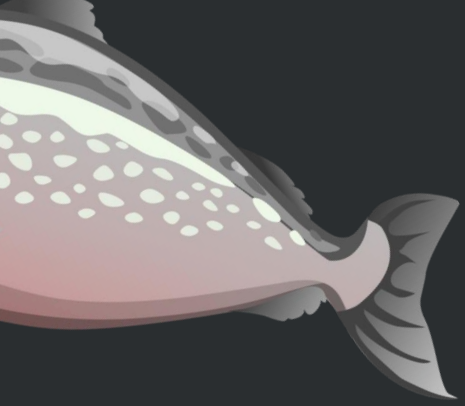

- Small sample size (35 participants).
- Short study period.
- Only one data collection tool was used (questionnaire).

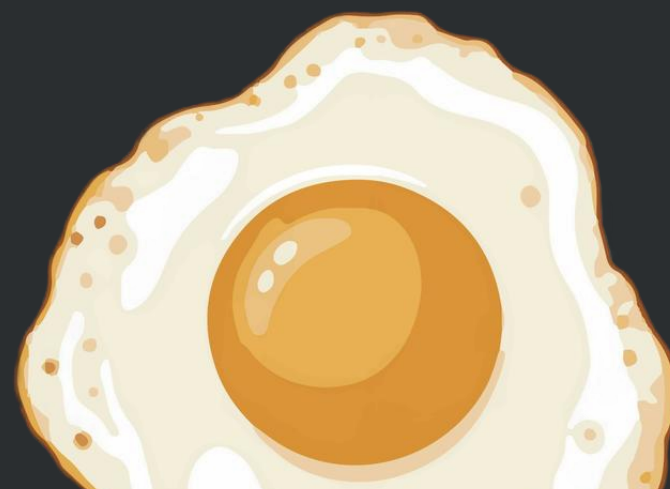

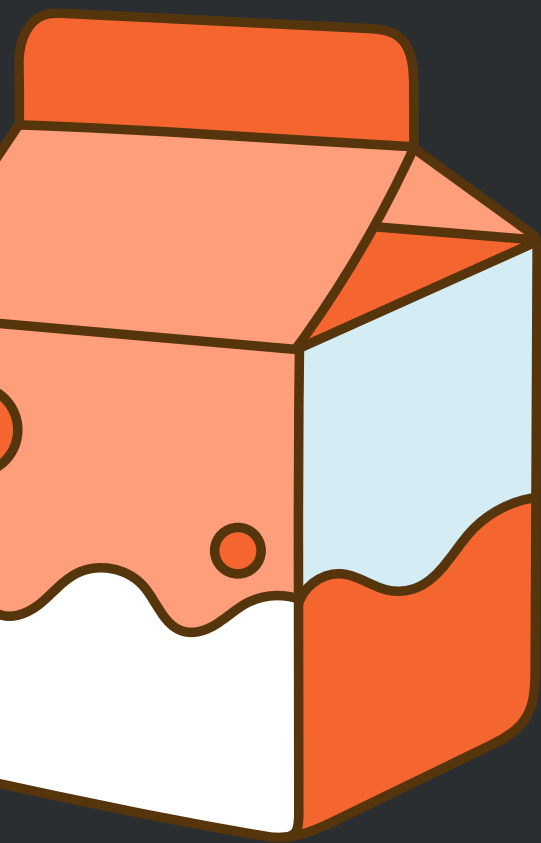

RECOMMENDATIS

- Increase parents' awareness about healthy eating habits.
- Reduce children's exposure to unhealthy food advertisements.
- Encourage healthy food content on social media.

IF I DO THIS RESEARCH AGAIN

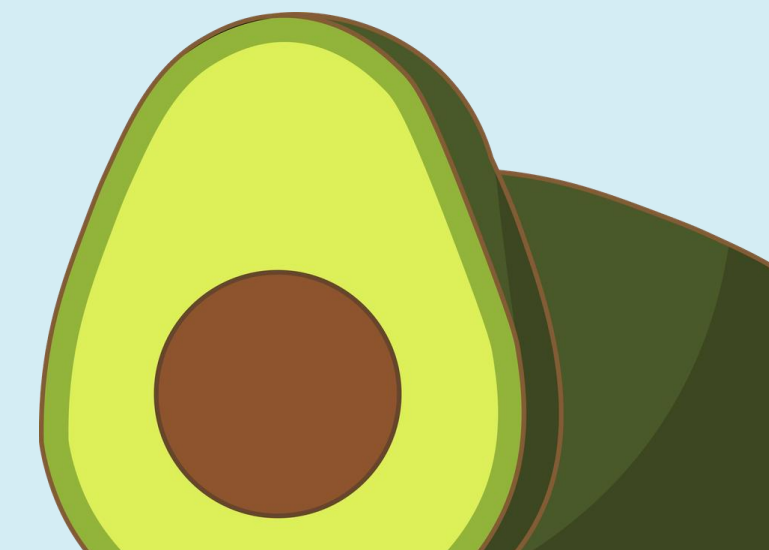

- Increase the sample size.
- Include participants from different regions in Saudi Arabia.
- Use more data collection methods.

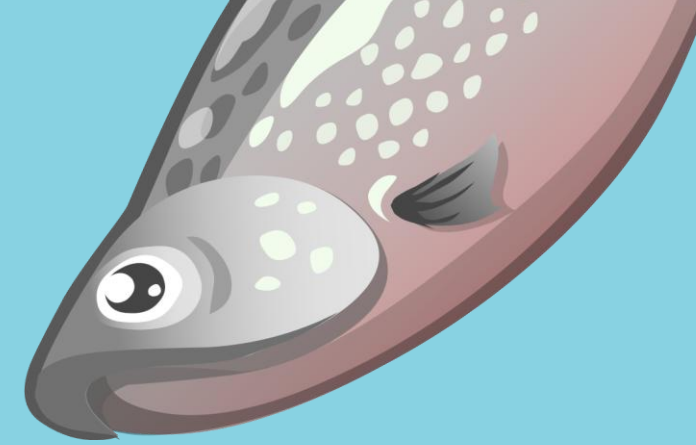

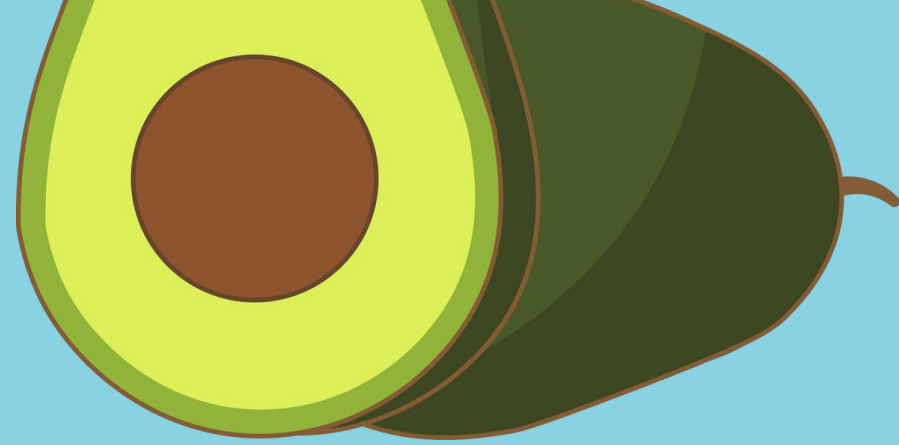

TAKE HOME MESSAGE

- Social media affects children's food habits.
- Influencers and advertisements affect food choices.
- Parents play an important role in reducing negative effects.

THANK YOU
